Forecast_Inefficient_Formula__c_Chart.png;

Hi Admin,

Attached is the forecast chart for **Inefficient_Formula__c**.

Below is a summary of the record:

FormulaSniffR Summary - Inefficient_Formula__c		
Cpu Red Flags		
Cpu Score	10 (Calculated as: (+2) × Nesting level + (+2) × Cross-object references + (+3) × Heavy functions + (+5) if too long + (+5) if unbalanced + (+5) if non-deterministic logic)	
Cross Object Hops	0	
Deps	Components referencing "Inefficient_Formula__c": - Layout: AB Layout - ApexClass: ShowFormulaField - ApexTrigger: Trigger_AB - Flow: Show Formula Field - Flow: Test Trigger	
Depth	5	
Dna	Blast Radius	high Used in Apex, Flows, etc.
	Chain Depth	low Depth of field dependencies
	Complexity	high Formula length & nested functions
	Fragility	medium Hardcoded values or risky constructs
	Usage	medium How often it appears in UI & reports
	Volatility	low Depends on frequently changing fields

FormulaSniffR Summary - Inefficient_Formula__c	
Field Name	Inefficient_Formula__c
Forecast Score	Now: 10 In 6 months: 15 In 1 year: 20
Heavy Function Count	0
Is Formula Too Long	false
Is Non Deterministic	false
Label	Inefficient Formula
Object Name	ab__c
Original Formula	IF(ISBLANK(Name), IF(LEN(OwnerId) > 10, IF(TEXT(CreatedDate) > "2020-01-01 00:00:00", LEFT(Name & TEXT(CreatedDate) & OwnerId, 20), RIGHT(OwnerId, 5)), "Short OwnerId"), IF(CONTAINS(Name, "Test"), MID(Name & OwnerId, 3, 7), UPPER(LEFT(Name, 5)) & LOWER(RIGHT(OwnerId, 3))))
Return Type	Text
Risk Level	Medium
Uses Record Type Or User	false

Thanks,
